David,  
I have reviewed the material you sent and have no problem with your products.  
Ron.

Ron,

Thank you for reviewing our green product, PRP, WellBoom and BioBoom. All of these can be used to absorb and remediate hydrocarbons on water. I understand that the state of Georgia can not indorse products but can approve them. As per our telephone conversation last week could you please send me a email stating that you have reviewed our product and that you do not have a problem with the use of it in the State of Georgia.

Thank you for your time in this matter.
